8510 - WELLNESS

As required by law, the Board of Education establishes the following wellness policy for the Miami East Local School District.

The Board recognizes that good nutrition and regular physical activity affect the health and well being of the District's students. Furthermore, research suggests that there is a positive correlation between a student's health and well being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

- A. With regard to nutrition education, the District shall:
 1. Nutrition education shall be included in the Health curriculum so that instruction is sequential and standards-based and provides students with the knowledge, attitudes, and skills necessary to lead healthy lives.
 2. Nutrition education shall be included in the sequential, comprehensive Health curriculum in accordance with the curriculum standards and benchmarks established by the State.
 3. Nutrition education shall be integrated into other subject areas of the curriculum, when appropriate, to complement, but not replace, the standards and benchmarks for health education.
 4. Nutrition education standards and benchmarks shall be age-appropriate and culturally relevant.
 5. The standards and benchmarks for nutrition education shall be behavior

focused.

6. Nutrition education shall include opportunities for appropriate student projects related to nutrition, involving, when possible, community agencies and organizations.
 7. Nutrition education shall extend beyond the classroom by engaging and involving the school's food service staff.
 8. Nutrition education posters, such as the Food Pyramid Guide, will be displayed in the cafeteria.
 9. Nutrition education shall reinforce lifelong balance by emphasizing the link between caloric intake (eating) and exercise in ways that are age-appropriate.
 10. Nutrition education benchmarks and standards include a focus on media literacy as it relates to food marketing strategies.
 11. Nutrition education standards and benchmarks promote the benefits of a balanced diet that includes fruits, vegetables, whole grain products, and low-fat and fat-free dairy products.

The Board designates the Superintendent and/or the building principals as the individuals charged with operational responsibility for measuring and evaluating the District's implementation and progress under this policy. The Superintendent shall develop administrative guidelines necessary to implement this policy.

The Superintendent shall report on the District's compliance with this policy and the progress toward achieving the goals set forth herein when requested to do so by the Board.
